AUTOSLIDE

K9/Smart RFID Tag Pouch Quick Guide
LSG0 12.1.20

While the AutoSlide RFID tag can be easily secured to a collar using the tag's key ring, it can be alternatively secured and protected using the AutoSlide tag pouch.

1. Flip back the top of the protective pouch as shown.

2. Remove the key ring from the tag and insert tag into pouch.

3. Flip forwards the top of the pouch to close over the tag. The pouch can now be secured to your pet's collar using the Velcro straps on the back.
